

Profile

I have more than 14 years of experience with HTML/CSS/JavaScript/jQuery from a freelance web design perspective and work hard to stay current on existing as well as emerging technologies. My recent web development experience also includes AngularJS, Bootstrap, LESS, Ajax, JSON, PHP, MySQL, Freemarker Template Language (FTL), REST integration, and various Responsive Design technologies. This combined with a previous 18 year career in IT services covering everything from level 1 help desk up to Network/Server administration make me a very well rounded technical resource and an ideal candidate for a wide range of projects.

Employer History

07/2012 - To date

IBM - ISC Lansing, MI, United States of America

Web Developer

I am responsible for developing web sites and pages for a high profile client on very tight schedules in a multi-vendor environment. I work closely with vendors and our Java back end team to troubleshoot existing sites and pages to resolve issues in a timely fashion. As well as play a key role in site development for a redesigned fully responsive web application that integrates FTL, HTML, CSS/LESS, AngularJS, JSON/Ajax, Java, and Adobe CQ into one cohesive environment for optimal user experiences.

01/2004 - 01/2012

BrassCraft Mfg

Altiris/PC LAN Admin

I was responsible for the management of all Novell web based management applications and the Apache/Tomcat server(s) as well as the creation of an internal web site for the centralization of web based troubleshooting tools in the Tech Support Department. I was also responsible for the management of Altiris .net web server(s) and software, the Microsoft SQL Server 2000 – 2008 backend management and the daily maintenance/troubleshooting/repair of all office technology to include desktops, laptops, servers, network equipment, and servers.

01/2000 - 07/2012

1107 Designs

Freelance Web Designer

As a freelance Web Designer I was responsible for the planning, design, and implementation of complete web sites, re-tooling existing layouts for an up to date appearance, and adding additional pages to existing web sites and applications. All work was designed with standards compliant code with emphasis on browser cross-compatibility, accessibility, and search engine optimization.

Projects @ IBM

03/2013 - To date

Coca-Cola - My Coke Rewards

UI Developer

Project Description: I am responsible for developing web pages and sites for the My Coke Rewards program within Coca-Cola. My main duties include wire frame review, site planning/scoping assistance, site development from provided creative files, and site testing and troubleshooting. This is a high profile, high demand client with tight development windows in a multi-vendor environment. I work very closely with other vendors as well as our Java back end team to ensure seamless integration and problem resolution. I am also responsible for training and mentoring new team members as they grow their web development skills in this project environment.

I also play a key role in the development of a new fully responsive web application using HTML, CSS/LESS, AngularJs, Ajax/JSON, FTL, and Java to deliver a smooth user experience on a wide range of devices with a common code base.

Projects @ IBM

07/2012 - 03/2013

Tiffany & Co.

Project Description: Maintenance & Enhancement work on current Tiffany & Co. internal and external web sites and applications. Re-Design of Tiffany.com using the latest in responsive HTML/CSS/Javascript technologies. Cross browser troubleshooting, testing, and issue resolution. Responsive Design testing and issue resolution for best fit and usability on tablet, iPad, laptop, and desktop screen sizes. Localization of files for language and country specific content.

Baker College, United States of America, 2004

Associate in Networking Technology - Novell

Baker College, United States of America, 2001

Other relevant information

Membership in professional organizations

International Webmasters Association member

Other job-related activities

Training/Mentoring - I have been responsible for helping to on-board new team members and get them up to speed on existing technologies and site layout as well as coach them in learning to utilize new technologies in their daily work. I have been a mentor to some younger resources while we worked on the same project team as well as after they had transitioned to a new project in business, career, and technology areas within IBM. My main goal is to share my knowledge with others and in the process grow my own understanding of technologies and working relationships.
